

**CONSTRUCTION & PROJECT MANAGEMENT**

June 21, 2016

Dear Award Committee:

Please accept this letter as a formal recommendation for MSI Mechanical Systems Inc., for the 2016 ABC NH/VT Excellence in Construction Awards.

As General Contractors we make a commitment to our clients to provide outstanding work in a timely manner. We value our relationships and carry out a promise of excellence in service. In fulfilling this commitment, we surround ourselves with the best subcontractors in the industry. MSI Mechanical is among the best in commercial mechanical services.

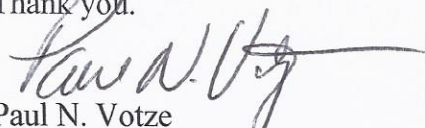

Together we recently completed a project for Cisco. The complete reconstruction of an existing data hall and modification to the building infrastructure in Lab #1305 at Building 300 was a highly technical project with an extremely aggressive schedule.

We have high standards and MSI continues to meet our project demands that include working with challenging timeframes and difficult site conditions. Equally important is the experience MSI has with working in data center environments. The HVAC requirements for a data center go beyond comfort, the cooling is vital in maintaining environmental conditions suitable for information technology equipment. Cisco expects their HVAC cooling system to operate continuously and reliably. MSI designed and developed a system that not only produces what is needed to maintain proper room temperature but one that is energy efficient.

We continue to be impressed with MSI's field crew. They work well with all the subcontractors on the job site and they were an instrumental part of the Project Team during our scheduled shutdown. They worked diligently to complete all tasks before the system came back online and they provided support to minimize disruption to Cisco staff and employees once the systems were up and running again.

Overall, MSI is very knowledgeable with data center cooling units. They work efficiently and professionally. Our client was very pleased with the work completed on Lab #1305 and we look forward to working with MSI on future projects.

Thank you.

  
Paul N. Votze  
President
